claire's DIY Button Headwrap For Face Mask

SUPPLIES
- DIY Face Mask
- Headwrap
- Buttons (2)
- Scissors & Thread

It's the stylish solution to making your face masks more comfortable! Find your fave headwrap or headband and let's get crafting!

STEP 1
With the headband on and comfortably placed, mark where you want to attach your mask.

STEP 2
Buttons should be above the ears at least 4.5-5 inches from the bottom of the headband.

STEP 3
Secure your buttons on to the mark by carefully sewing them in place.

STEP 4
Test out your new headband with your face mask to make sure it's in a comfortable spot where your mask is secure.

The US Centers for Disease Control and Prevention (CDC) recommends wearing cloth face coverings in public settings where other social distancing measures are difficult to maintain (e.g., grocery stores and pharmacies), especially in areas of significant community-based transmission.

CDC also advises the use of simple cloth face coverings to slow the spread of the virus and help people who may have the virus and do not know it from transmitting it to others. Cloth face coverings fashioned from household items or made at home from common materials at low cost can be used as an additional, voluntary public health measure.

Cloth face coverings should not be placed on young children under age 2, anyone who has trouble breathing, or is unconscious, incapacitated or otherwise unable to remove the mask without assistance.

The cloth face coverings recommended are not surgical masks or N-95 respirators. Those are critical supplies that must continue to be reserved for healthcare workers and other medical first responders, as recommended by current CDC guidance.

If you're feeling extra crafty,
Make a few more to donate to your local hospital!

This tutorial is not meant to replace medical grade face masks... just a helpful reminder to not touch your face!
