

# Popsicle Stick Bracelets

AN EASY AND AFFORDABLE, DIY JEWELRY CRAFT

## SUPPLIES

- Jumbo craft sticks
- Mod Podge or glue
- Acrylic paint
- Paint Brushes
- Glitter

### STEP 1

The first step is to put your jumbo popsicle sticks or craft sticks into a pot of boiling water for 45 minutes. You'll want to boil extra popsicle sticks because they will break or snap. Once complete, let them sit in the water for another 30 minutes to cool.

### STEP 2

Once the water has cooled down, take out one popsicle stick at a time and slowly start to bend the popsicle stick with your hands and into a jar lid. Once in a jar lid, let them sit overnight until they are dry.

### STEP 3

When your popsicle sticks are completely dry they can be removed very easily from the top of the jar lid.

### STEP 4

Now the fun part, decorating! Paint any designs you like and add glitter or gems for extra bling!

Walla! You now have popsicle stick bracelets that will have your friends talking. Give it a try and let us know how yours turns out!
